No Scripts Needed  
No relationships, No Linked Fields  
Just One Calculation Field

Works With Filemaker From Version 5 - 8  
**Now Universal For 8.5**

Windows 98 SE, ME, XP,  
2000, 2003  
Macintosh OS9 and  
Mac OSX including 10.4

## Tutorial

### "Setting Up A Barcode System, Stock Control, Inventory, POS, Item, Asset Management System or Library in Filemaker Just Got Simple..."

#### Installation for Apple Macintosh (Mac OSX including Tiger)

Barcode.fmpplugin

**Filemaker 7, 8, and 8.5:** Drag Barcode.fmpplugin from the Mac Plugin folder to the Extensions Folder in the FileMaker Folder.

Barcode.suit

**Mac OS X:** Drag Barcode.suit (fig 2) from the fonts folder in this folder to your fonts folder in your Library folder.  
Then restart FileMaker to see the plug in and font.

#### Installation For Windows (98,ME,2000,XP,2003) PC's

Barcode.fmx

**Filemaker 7, 8 and 8.5:** Drag Barcode.fmx from the Windows Plugin folder to the Extensions folder inside the Filemaker folder on your hard disk

Barcode.TTF

Drag barcode.ttf onto your fonts section of the control panels in the start menu.

Then restart FileMaker to see the plug in and font.

#### To Make the Barcodes

Go into layout mode by pressing Apple L on a mac or Ctrl L on a PC.

1. Choose File > Define > Database on Filemaker 7, 8 and 8.5.

Type "datafield" into the field name box as shown in fig5.  
Create a text field by selecting text as the field type,  
(n.b. in a popup menu on Filemaker 7, 8 and 8.5).

fig5

2. Click Create.

3. Make a New Calculation Field choosing Calculation as the type for the field, (**n.b. in a popup menu on Filemaker 7, 8 and 8.5**).

4. Then type a name for your field and select Create (In our example we have used "New calculation field") fig 6.

Fig 6

5. Create will take you to the calculation field preferences (fig 7).

Choose "Text" from the "Calculation result is" popup menu.

6. Type Barcode\_CreateCode ("Code39"; datafield ;100;15;0;1) in the box provided, as shown in fig 7. (or choose the function from the External function list in the top right corner and set the parameter to Datafield). Then click OK.

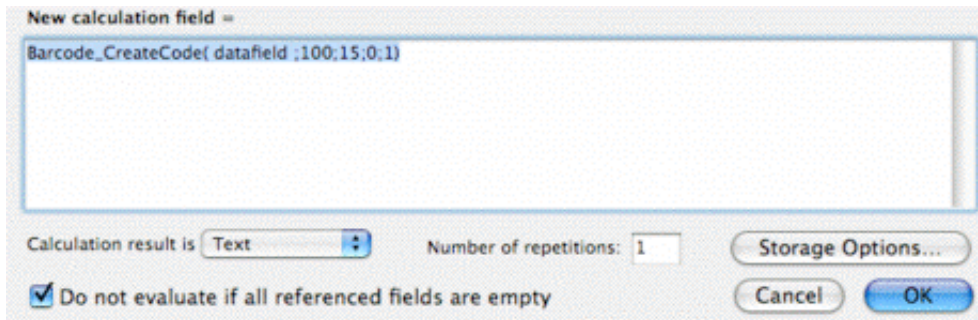

Fig 7

#### Notes

- On your system the comma ( , ) may be a semi-colon ( ; ).
- Replace Code39 with the code type you require ie EAN13.
- Datafield is the name of the field where you want to get the data for the barcode from this can be any field in your database.

7. You should now have 2 fields like those shown in fig 8.

Field Name	Type	Options / Comments (Click to toggle)
* datafield	Text	
* New calculation ...	Calculation	= Barcode_CreateCode( datafield ;100;15;0;1)

Fig 8

7. Click OK on Filemaker 7, 8 or 8.5. This will take you back to the layout.

### To Finish Setting Up

You will now have a new field on your layout.

- Select the new field on the layout.
- Now select Format > Font > Barcode from the menu bar to set the font for your field to barcode as shown in fig 9.

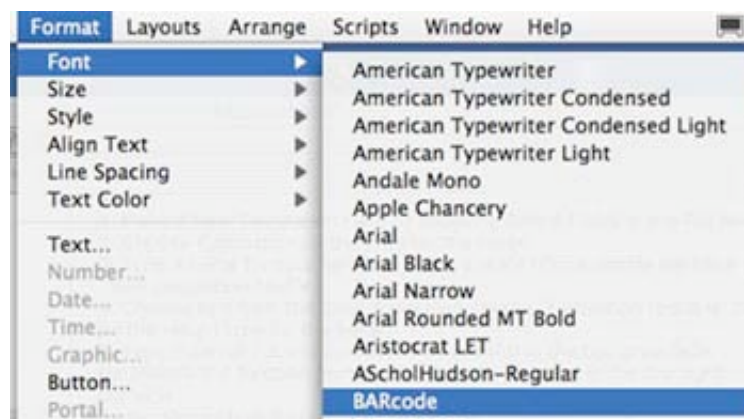

fig 9

- Select Format > size > 10pt to set the font size to ten points.
- Select Format > Line Spacing > Custom, This will take you to fig 9.
- Select pixels from the dropdown menu to the left of the Height field
- Set the Height field to 10 pixels (fig 9).

fig 9

- Click OK

This returns you to layout page with the barcode field now setup.

Choose Browse Mode (Apple B on the Mac, Ctrl B on Windows) to view your barcode which is now ready for printing(fig 10).

fig 10

There are a lot of other options you can apply to the barcode using Barcode for FileMaker, but if you just need a simple barcode this is all you need to do.

## Our No-Nonsense Licensing Policy

**We have a no-nonsense licensing policy.  
Everything you need to make bar codes in FileMaker is included in the price.**

**We include our Barcode Font free of charge.  
You do not need any extra fonts or anything else.**

**Licensing is per machine that the Plug-In is installed on.  
If you create bar codes on a machine you must buy a license for it,  
but you can view and print the codes from any copy of FileMaker  
using the free Barcode Font included.**

**You can have the Barcode Font on  
as many machines as you like for no extra charge.**
