[CYK Desktop v1.06]

Xander Obrzut

Introduction.

Welcome, to CYK Desktop – the replacement for your XP original. CYK Desktop can be utilised in a variety of methods but specifically as a back end for a suite of applications.

In this version of CYK Desktop is the Twitter Interface. CYK Desktop is not affiliated in any way with www.twitter.com and we appreciate that Twitter retain their copyright mark with the Twitter name.

We have called this flavour of CYK Desktop 'Twitter Desktop' but this name will soon change to 'Social Media Desktop' when we add Facebook and Google interactives.

[CYK Desktop v1.06] uses the Twitter API as provided by Mr Roelands. Now, Mr Roelands only provided Oauth Authentication for Twitter and nothing else. The rest of the code – such as the XML parsing – was coded by my good self : Xander Obrzut.

The entire CYK Desktop – apart from the

GetInternetConnectionState() routine (which was taken from the Visual Basic Cookbook – courtesy of Microsoft Press) – was coded by Xander Obrzut.

The graphics utilised in version 1.06 were taken from Open Source websites and Google Images. Now, in future releases this project will comply with Open Source requirements and use only open source graphics and drop the Google Images wallpapers.

These are the plans for future versions of CYK Desktop: Social Media Engine.

The Basics

The basics involve installing the replacement desktop for XP with the .msi installer file and following the on-screen instructions. After installation; double click on the CEK Desktop icon (note the difference in spelling – CEK Desktop is in fact the back end – where as CYK Desktop is the Twitter Desktop) to start the Desktop running.

After clicking on the message box that appears – you will be briefly logged out. When this happens, sign into your original account and you will be presented with CYK Desktop in all its glory.

If you think you might lose your original XP Desktop – think again! This is not a permanent fix for XP. Your original desktop will be re-instated when you sign out of CYK.D.

Best wishes,

Xander O.
